

Kilian Kolb

Date of birth: 18/04/2004 | **Place of birth:** Rosenheim, Germany |

Nationality: American, German | **Phone number:** (+49) 15752398194 (Mobile) | **Email address:** kilianmiko@gmail.com | **Address:** Fragnerstraße, 14, 83224, Grassau, Germany (Home)

EDUCATION AND TRAINING

CURRENT Maruqartstein, Germany
ABITUR LSH-Marquartstein

Address Neues Schloss 1, 83250, Maruqartstein, Germany

01/08/2022 – 08/09/2026 Salzburg, Austria
BACHELOR Fachhochschule Salzburg

Multimedia Technology
Game Development
Computer science

Website https://www.fh-salzburg.ac.at | **Level in EQF** EQF level 6

WORK EXPERIENCE

INTERN TECHART – NIGHTINGAMES – 01/09/2025 – 23/12/2025 – BAYREUTH, GERMANY

Work as a Tech Artist, in Unity and Unreal Engine for an Indie Studio, "Nightingames".
In Unreal:
- Worked on "Loxia - Herbs & Potions"
- On Game Logic, with Blueprints and Code
- On Materials, Material & Post processing functions
- On UI Elements

In Unity:
- Worked on a Prototype
- Code, Art
- Gamedesign

SKILLS

Version Control (Git) | Good knowledge of C++, C# and OOP | Code Optimization

LANGUAGE SKILLS

Mother tongue(s): **ENGLISH** | **GERMAN**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
FRENCH	B2	B2	B1	B1	B1
LATIN	A2	B1	A1	A1	A1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

PROJECTS

03/04/2023 – 03/06/2023
To Catch The Biggest Fish

To catch the biggest fish is my first major Projekt made as a part of the mmp1 at the fh salzburg. It features a self made game engine, art, and game design.

Gameplay:
The Player casts a line and catch fish with a quick time event. The deeper the line goes, the more a fish is worth. The Player can then sell the fish for upgrades. The goal is to catch the biggest fish.

My Tasks:
Code (All: Game Engine, AI, Player Controller, Game State Machine, Collision detection)
Art (all)

made with:
C#, SFML in a self made game engine

Link https://wahoza.itch.io/to-catch-the-biggest-fish

Flying Frogs

Flying Frogs is a 4 player local multiplayer game, made in a 3-day gamejam with a team of 5 and expanded upon in private. It won 3rd place at said game jam.

GamePlay:
3 players are frogs, one is a fly. The players try to catch the fly. when a player catches the fly, that player becomes the fly. The player with the most points as the fly wins.

My Tasks:
Basic Ai of the fly and frogs as NPCs
Fly controlls
Some Backend things
Particle Systems

Made with:
C#, GD Script in Godot
(also released to steam)

Links https://schlutzkrapfen.itch.io/mmj-2024 | https://store.steampowered.com/app/2998670/Flying_Frogs/

28/04/2024 – 28/05/2024

Ocean Paddlers

Ocean Paddlers is a 2 player local multiplayer game, developed as the mmp2a project (required by the Fh-Salzburg), in a group of 2, expanded upon in private.

Gameplay:
2 Players navigate a raft through a river avoiding obstacles and collecting eggs in a progressivly generating map.

My Tasks:
Most art
Most code (AI, Controlls, Map generation, Collisions, Gamestate, Point tracking, Particle systems, ...)
Level Design

Made with:
C++, SFML, Tiled, semi-selfmade Engine

Link https://wahoza.itch.io/ocean-paddlers

29/11/2024 – 01/12/2024

TrenchCo(a)t

Trenchcoats is a 3 player local multiplayer game, made in a 3-day gamejam in a team of six.

Gameplay:
Up to three players play as a group of cats that buys groceries from a store, in a stealth game environment. The players can assemble in a coat to hide from other shoppers and steal from them.

My Tasks:
Code (for the coat and items)

Made with:
C#, Unity

Link https://wahoza.itch.io/trenchcoat

01/12/2024 – 28/02/2025
Parkour Quarrel

Parkour Quarrel is a (up to) 5 player local (online in work) multiplayer game, made in private.

GamePlay:
Players race across a map, featuring diverse obstacles. Points are awarded upon reaching the goal. After all players finish, they get to place obstacles into the world. First to cross a point threshold wins the game.

My Tasks:
Code (All: Player Controller, Game State Manager, etc.)
Shader (Water Shader, Outline)
3D Art (All)
UI (All)

Made with:
C#, Unity

Link https://wahoza.itch.io/parkourquarrel

07/03/2025 – 09/03/2025
Yesshopping

Yesshopping is a typing game, made in a 3-day gamejam with a team of 5. It won the game jam.

Gameplay:
The Player writes text for the tv show host to speak in order to sell items. Words are scored based on scrabble scoring and build audience retention. The goal is not to loose the audience and to get a high total score.

My Tasks:
Shader,
Backend programming for some objects

Made with:
C#, Unity

Link https://dreiegg.itch.io/yesshopping

01/03/2025 – 12/06/2025
OATS

OATS was created as a project for the mmp2b at the FH-Salzburg, in collaboration with another student.

Gameplay:
Oats is a 3D real time strategy base defense game. Players control multiple troops of pigs and send them out to defend heaps of oats from an onslaught of various enemies with different types and effects. Pigs can be upgraded throughout the game and change their default type with 3 different types to choose from. Basic stats from the pigs can also be upgraded, and new troops can be purchased, depending of the amount of oats you have in your pile. This amount increases depending on how many heaps survived the round. With each successful round, more enemies spawn. If the player ever runs out of oats or troops, they loose.

My Tasks:
Shaders
Some Game Logic
Some Game Design
Entity AI
3D Art

Made with:

C#, Unity, Blender

Link https://wahoza.itch.io/oats

31/05/2025 – 31/07/2025
Moledown

Moledown is a solo projekt, created during the summer of 2025. It was created to learn about marching cubes and the optimization thereof.

Gameplay:
Players attempt to last the longest on an island that is destroyed over time. Players can notably grab the terrain, punch through it, and collect various powerups. Different enemies that destroy the terrain also spawn, making staying alive challenging.

My Tasks:
Code (everything, notably heavy optimization of the terrain via chunking and multithreading)
Art (everything)

Made with:
C#, Unity & Blender

Link https://wahoza.itch.io/moledown

26/09/2025 – 29/09/2025
Bureaucracy & Belvedere "Truth Lies & Democracy" Game Jam

Bureaucracy was created during the 2025 "Truth Lies & Democracy" Game Jam, hosted at the Belvedere in vienna. Bureaucracy won first place in it's category. Notably, this was with the same team from yes shopping, we were enabled by the fh to compete here due to the yes shoppings victory.

Gameplay:
The Player validates ballots, and sorts them based on their validity. Over time, strange rules are added to the ballots, that add to the challenge. The player must reach a certain quota of ballots over time, otherwise they loose.

My Tasks:
Shaders
Game Design
Some Game Logic
3D Art

Made with:
C#, Unity & Blender

Link https://dreiegg.itch.io/burocracy

01/10/2025 – CURRENT
Train of Thought – Murder on the Silver Line

Train of Thought – Murder on the Silver Line is a narrative-driven detective mystery game that combines exploration, puzzles and logical deduction into a handcrafted whodunit experience, created as a team of 9 (6 Art & Audio, 3 Programming) (with 3 additional external Students briefly working on the project)

Gameplay:
The Player explores a train as Maeve Ashford, solving puzzles by interacting with various NPCs and inspecting various items.

My Tasks:
Code (Backend, Object Interaction, Player controls)
Shader coding

Made with:
C#, Unity

Link https://store.steampowered.com/app/4994410/Train_of_Thought__Murder_on_the_Silver_Line_ACADEMIC_VERSION/

HOBBIES AND INTERESTS

Art & Dailies

I create phyiscal and Digital Art on occasion using Blender, Procreate & Unity, and quite frequently post them to my Instagram

Computer technology

Following of some Trends and recent events

Videogames

I enjoy playing and learning about Videogames, and on occasion creating my own, most uploaded to my itch page

Link https://wahoza.itch.io
